

# Introduction to Diagnostic Musculoskeletal Ultrasound

**Price : £475 + VAT**

**New dates regularly added.  
See website for details.**

COURSE ACCREDITED BY :

THE ROYAL COLLEGE OF RADIOLOGISTS (RCR) FOR 11 CPD POINTS

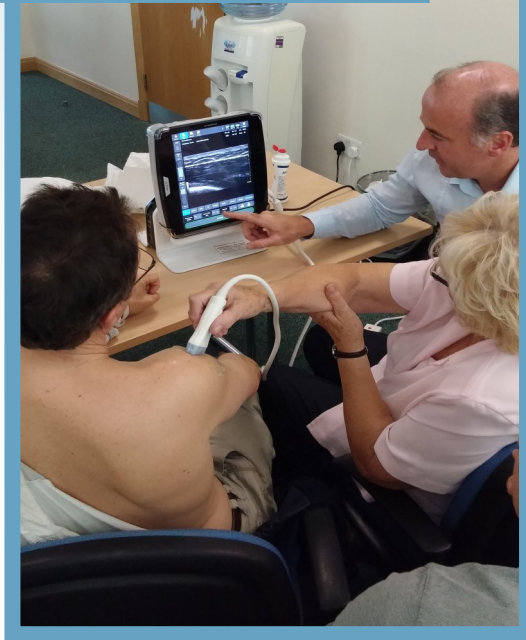

Learn to use ultrasound imaging in your practice to look dynamically at soft tissue injuries and other musculoskeletal conditions. Gaining ultrasound skills and improving your anatomical knowledge are proven to make clinical diagnoses more precise and reduce uncertainty in the choice of therapy.

This two day course will provide practitioners with the fundamental skills and information to commence making appropriate use of Diagnostic Ultrasound in such cases.

Designed for Physiotherapists, Osteopaths, Chiropractors, Sports Physicians, Therapists, Chiropodists and Rheumatologists, the course will cover the basics and fundamentals of ultrasound scanning using theory and a full day of hands on to learn and improve the use of the machine and probes. The second day uses a high ratio of teachers to delegates ensuring attendees receive the most benefit from the practical sessions.

The course is suitable for those contemplating the use of Ultrasound within their practice or existing users wanting to improve/extend the service currently offered.

## Topics to include

Where and when to use Ultrasound

Equipment technology

Basic imaging technique. Machine and probe skills

Image formation and optimisation

Imaging anatomy and typical appearances

Pathology recognition through case studies

Practical imaging of the knee, shoulder, elbow and ankle

Plan for ongoing training and governance

How Ultrasound can assist your practice
